Companies with over 10 lines we can save you in most cases 25% on your phone bill, consolidated billing and better phone support.

No changing hardware, No disconnects, No down time, No lost phone numbers.

Business Solar Energy:

An energy strategy is a business mandate.

Data from the Rocky Mountain Institute says utility bills represent 30% of operating costs for the average business. Commercial Solar helps our customers reduce their energy expenses by making solar a part of their broader energy strategy. Our goal is to maximize customer savings that can be reinvested into differentiating and growing their core business. Savings generated by solar can be substantial. We have many programs to offer— Lease, Cash or Loan, and Power Purchase Agreement with no upfront costs. Our partners have been in business for over 20 + years and helped companies like IKEA save money with solar.

Business LED lighting:

We can replace your business parking lot with quality energy saving LED outdoor parking lot lights. We can also replace the business florescent ceiling lights with quality energy saving LED lights.

Many leading medical reports are coming out stating that LED lights are easier for employees to work with less headaches and problems compared to traditional florescent ceiling lights.

We are always researching government rebate and tax credit information, and finding numerous programs which enables property owners to improve their lighting substantially for sometimes little or no additional long term costs.

Business HVAC & Building Controls:

We can replace your current HVAC with an energy efficient system, as well as monitor and control remotely key devices for businesses and restaurants such as freezers, refrigerators, lights, AC, and other systems.

EV Charging Stations:

We work with leading providers of electric vehicle (EV) charging solutions for commercial, enterprise, hospitality, university and government facilities. Our partners have developed the industries most robust and flexible cloud-based platform for the management of charging stations and the drivers that use them.
